
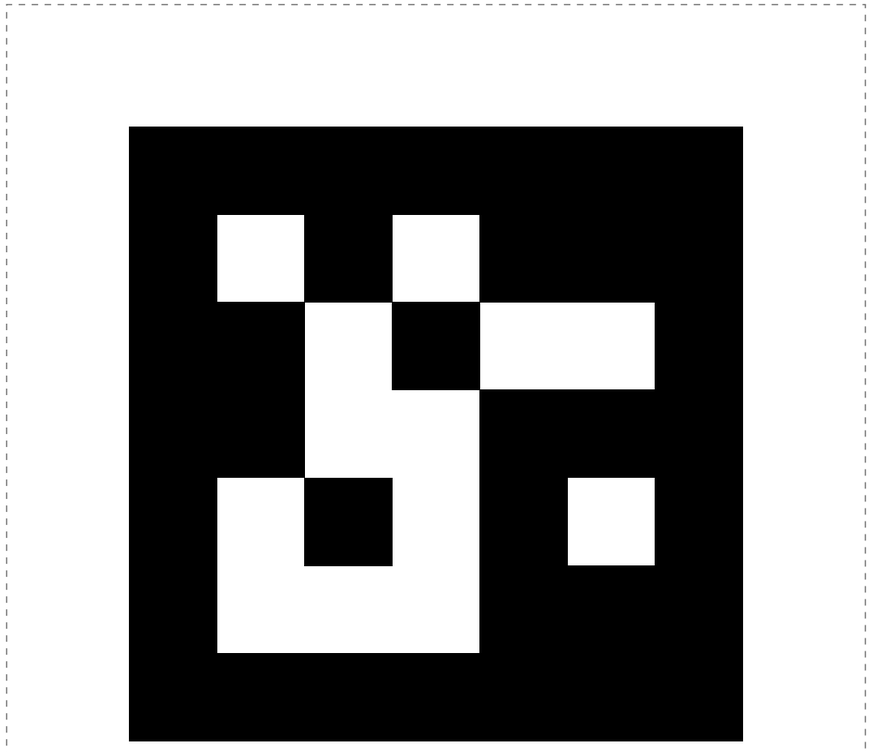
this bar must measure 100.0 mm - if it does not, the print was scaled

A3 420 x 297 mm | ArUco DICT_5X5_100 id 0 | outer black square 100.0 mm | centre 210.0, 148.5 mm from the bottom-left corner | corner crosses 10.0 mm in from each edge



SPARE / SPACER COPY - only needed if the marker must sit level with the tops of the objects.
Cut on the dashed line and glue to a 10 mm spacer, then set the spacer down on the marker printed on page 1
so its black square covers that one exactly. The centre stays 210.0, 148.5 mm and nothing needs measuring.
The 20 mm white margin around the black square is the quiet zone - do not trim inside it.
